			G. Julius K. Nyerere
			H. Hasan Bin Omar
			Makunganya

## SECTION B

3. Read the following passage and answer the questions that follow by writing the correct answer in the space provided.

Our school has clean environment. Dirty environment is a hiding place of dangerous insects and animals such as houseflies, mosquitoes, rats and snakes. Among those living organisms, snake is the most dangerous because its poison has big effects on both human and other animals. It is important to live in a clean environment.

Clean environment reduces the spread of diseases such as malaria and cholera. Malaria is spread by mosquitoes which live in tall grasses and stagnant water. Cholera is spread by houseflies which live in tall grasses. Those diseases can be avoided by slashing grasses and cover up holes to remove stagnant water. Clean environment also helps us to get a fresh air such as oxygen. In order to maintain

cleanliness in our environment, we are supposed to conduct daily cleanliness by using a hoe and a slasher.

### **Questions**

a) Why it is important to live in a clean environment?

---

---

b) Which living organism has poison and can harm people and other animals

---

---

c) According to the passage, mention one instrument used for cleanliness

---
