This demo illustrates PDF text markup annotations:

- Highlight (The text is highlighted.)
- Strikeout ~~(The text is strikeout.)~~
- Underline (The text is underlined.)
- Squiggly underline (The text is squiggly underlined.)

In this demo, you can find text and markup it. To do this:

- Load a custom document by clicking **Select document…**

- Specify the text to be found in a document and markup type in the demo options and click **Find and Markup…**

As a result, all occurrences of the text in a document are marked up.

To save the resulting document, click **Download**…
